

Applied Energy – Fact Sheet

ADDING VALUE BY CREATIVE AND EFFICIENT LIGHTING DESIGN

For Whom? Property Owners, Operators, Designers, Branding Teams.

Why? Lighting design has a significant impact on the built environment and can truly accentuate your facility. Appointing the right team is critical to a successful project.

When? At any time, but ideal times are prior to a major refit, relocation, re-organisation, energy efficiency drive or new investment.

How? Applied Energy have the technical expertise and very considerable experience to develop cost effective yet dramatic lighting solutions to enhance your development.

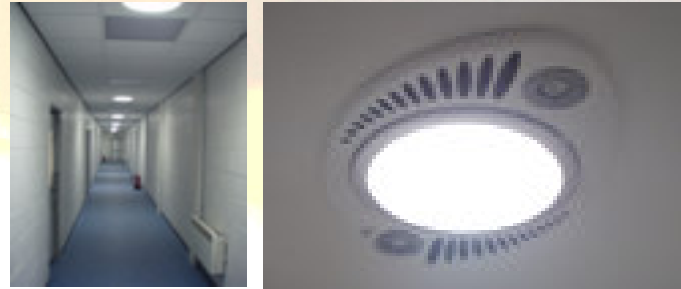

Other Opportunities? Whilst carrying out this work Applied Energy have commonly identified innovative controls and improvements to energy efficiency in the overall quest for profit enhancement.

A Complete Service? Applied Energy can provide a fully coordinated service from inception to electrical wiring design, and specialist commissioning.
